Management Survey of ORE Administrative Staff

HM

1. The attached management survey and accompanying comments from Assistant Directors in connection with the situation room problem are provided for your information and for further action in connection with paragraph 4 of the memorandum from the Management Officer dated 7 March 1950.

2. Other matters included in the survey report, including the problem in connection with Information Control, require no COAPS action at this time. A later request for review of the Information Control situation may be made after completion of the entire ORE survey.

3. Request a recommendation from COAPS as to the type and scope of an ORE situation room considered necessary for this Agency. In this connection, a previous verbal determination was made by the Director that it was not necessary to maintain in ORE a situation room in scope beyond that to meet ORE internal needs.
